KWS SOLITAIRE

Group 3 Winter Wheat

- Market leading combination of grain quality, earliness and disease resistance
- Highest yielding soft wheat – best performances in the west (109%)
- Harnesses all soft markets – Group 3, UKS, distilling and feed

New for drilling autumn 2025, KWS brings you one of the most complete agronomic packages available for the soft winter wheat market. The true jewel in the crown, KWS Solitaire brings high yield and gross margin opportunities for all growers with access to all soft wheat markets from biscuit to distilling to export and feed.

Outstanding yields are achieved no matter the site nor the season – with best performances to date seen in the west where, at (109% controls), it out-yields newcomer Bamford. In addition, KWS Solitaire has very high untreated yield (88% of treated controls) thanks to its excellent set of disease

characteristics including [6] for mildew, 8 for yellow rust 6.7 for *Septoria* and 6 for Fusarium ear blight.

But the advantages of KWS Solitaire don't stop just at gross margin potential; a high tillering variety, with good straw and early maturity, it's a wheat that offers flexibility on-farm and can be sown from mid-September right through the end of January.

KWS Solitaire – make your fields sparkle with magic this autumn!

Hagberg Falling Number	179
Specific Weight (kg/hl)	77.1

KWS SOLITAIRE - Sowing for Peak Performance

80% of your crop’s potential is locked in by the seed you buy and sow. While you can fine tune this with the correct nitrogen levels, using fungicides wisely to protect it from disease and paying attention to basic management principles, many attributes of your crop can’t be changed. Therefore, it pays for you and your agronomist to make proactive choices before ordering a variety.

To get peak performance from KWS Solitaire we recommend drilling in the following time window:

At KWS, we believe to get the best performance on your farm it is critical that when you choose your variety, you are using a wealth of data to tailor your choice for both your farm and individual field situation.
